

“Callaway Marine found the Creative Pultrusions piling to be easy to install and provided a classy addition to the Veterans park Project for the City of Delray. The ease of installation and deck attachment made the project easy to complete on time for the Owner.”

~ Rod Coddington, Principal Engineer  
Callaway Marine Technologies

## MARINE INDUSTRY

# CITY OF DELRAY BEACH VETERANS PARK MARGINAL DOCK

## Project Description

Creative Pultrusions' 12" x 1/2" SUPERPILE® was specified for use on the Veterans Park Seawall and Marginal Dock project in the City of Delray Beach, FL. A total of 34 piles, 30 feet in length were utilized to complete the project. Not only were the piles used to support the docks, but they also act as fender piles for the Delray Yacht Cruises sightseeing boats. With the use of SUPERPILE® the engineer was able to use a pile that has a greater life expectancy, is low-maintenance, aesthetic, green, and environmentally friendly alternatives to handle the sightseeing boats and yachts.

## Location

Delray Beach, FL
